

Poseidon 4001

Access and environment monitoring for data centers, SNMP compliant

Poseidon 4001 is a complete solution for access control and environment monitoring in IT applications.

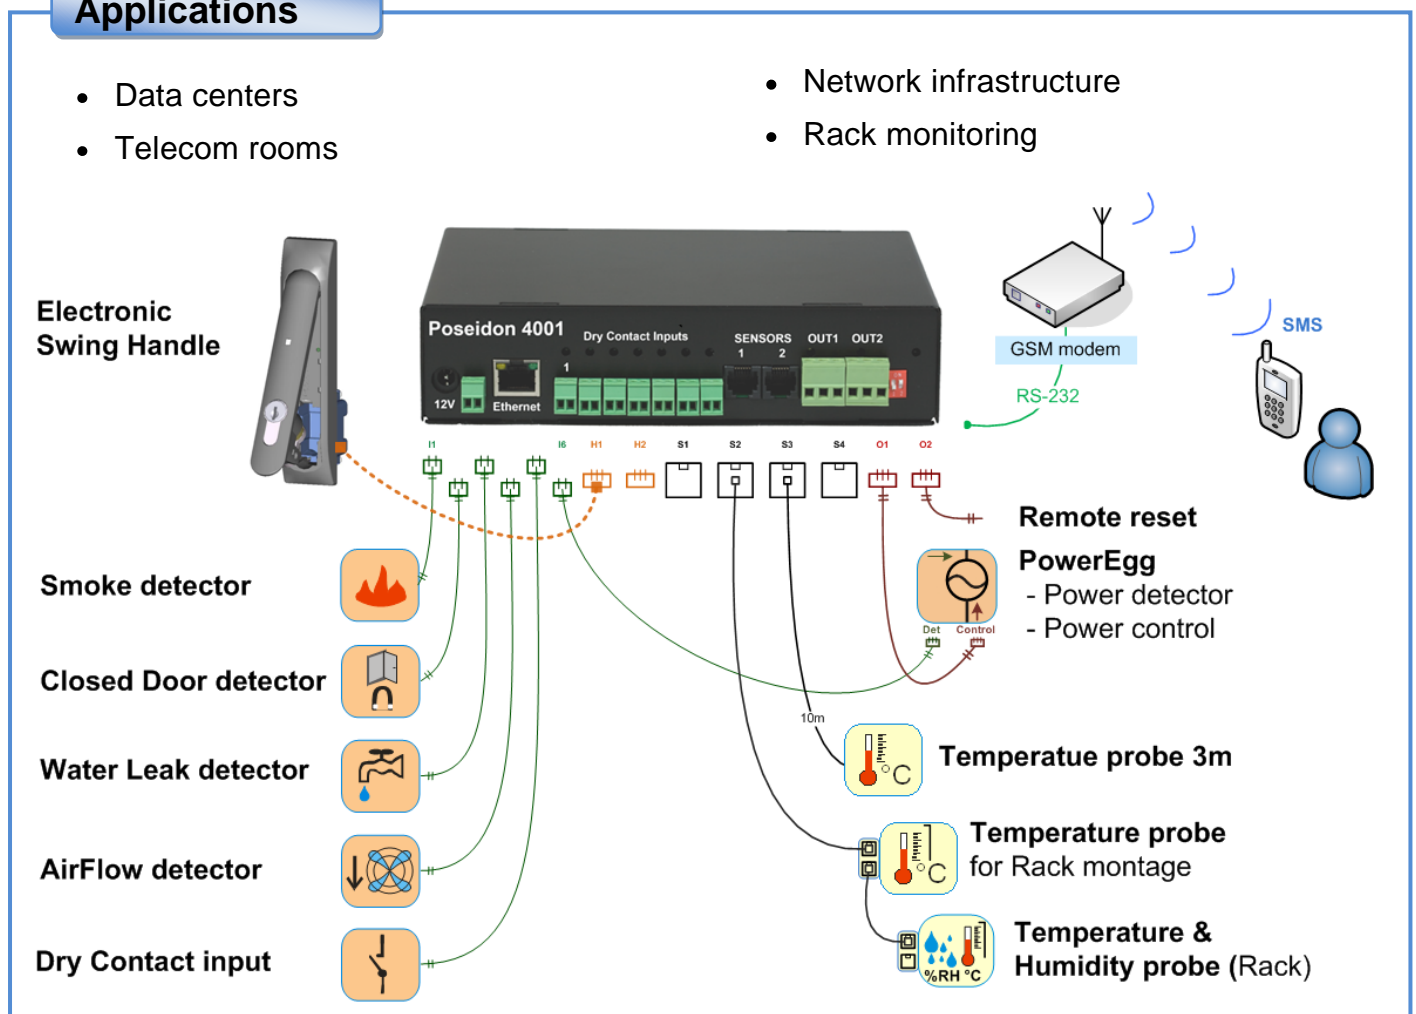

- Electronic swing handle included
- Embedded WEB server
- Alarm alerts by e-mail
- SMS alarms (local GSM modem)

- SNMP / SNMP traps
- Easy NMS integration
- Supports 18 external sensors up to 30m

Applications

- Data centers
- Telecom rooms
- Network infrastructure
- Rack monitoring

Basic features

- Controls SH1 swing handles for racks
- Built-in **graphical WWW interface** for configuring the unit and monitoring the readings
- Fits into a 19" or 10" rack
- Supports GSM modem for sending alerts by SMS, independently of the network
- Functions as a **thermostat**:
Outputs can be used to signal a lower/higher sensor reading
- **Security** ensured through a password, IP address range, HW protection against config changes
- Works with a wide range of sensors.

Poseidon model 4001

- **Inputs** (relay contacts): **6**
- **Outputs** (relay contacts): **2**
 - Electronic swing handle SH1 **Yes**
- **Sensors**
 - **IT bus** (local area): **12**
- **SNMP**: **Yes**
- Alarm alerts by e-mail: **Yes**
- **GSM modem** (SMS alerts): **Yes**

Supported sensors

- Contact
- Temperature
- Humidity
- Water leak detector
- Smoke detector
- Voltage sensor (110/230V)
- Air flow detector
- Contactless AC current sensor (110/230 VAC)
- General voltage / current sensor

Physical features

- **Dimensions:** 184 x 44 x 125 mm (1U)
- **Power:** 12V / 0.5A jack + terminals
PoE + 48V (2 terminals, real panel)
- **Temp / Humidity:** 5..50°C / 20..80% R.H.

Outputs

- **Double-throw contact:** 50V / 1A DC
 - SH1 swing handle output
- **Control:** SNMP / XML / local condition
