HW group Introduces Dedicated IP I/O Devices Compatible with Omnicast, Genetec's Video Surveillance Solution

Prague, June 30 -- HW group, a manufacturer of IP-based sensors, is entering the IP surveillance market with the introduction of HWg-Juno. HWg-Juno is a specialized device for integration of I/O's into Genetec's Omnicast. We are thrilled to bring to market HWg-Juno as first dedicated IP I/O device supporting the Genetec Protocol. Now you can simply connect any number of digital inputs & relay outputs to Genetec's Omnicast system.

HWg-Juno is using the Genetec Protocol extension on the Omnicast Archiver. No drivers are necessary. HWg-Juno is certified to be used in Omnicast systems from version 4.6 with Hardware Integration Pack 1 (HIP1) and newer.

Juno product line consists of:

- **HWg-Juno 101** with 1 dry contact input and 1 relay output. PoE and 70°C endurance make this ideal outdoor IP I/O device for low count I/O needs.
- **HWg-Juno 404** with 4 dry contact input and 4 relay outputs is universal IP I/O device.
- **HWg-Juno 1200** with 12 dry contact inputs and PoE is ideal replacement for multi-port I/O, available in past on multiport videoencoders. Typically used for security systems alarms integration.
- **HWg-Juno 008** with 8 relay outputs and PoE is universal IP control box for low and AC voltage device control. AC voltage device control requires optional PowerEgg accessory.

With the introduction of HWg-Juno compatible with Genetec's Omnicast system, the HW group is also introducing the **Juno HW Early Access Program**. Please contact Jan Berka, HWg-Juno manager, e-mail: iberka@hw-group.com for program flyer and order form or visit www.hw-group.com for more information.

About HW group

HW group is a manufacturer of IP-based sensors. HW group delivers remote monitoring & control solutions.

HW group Company is based in Prague in the Czech Republic. Company is focused to IP-serial port devices and IP remote monitoring products. HW group distribution network span over Europe, Middle East, South & North America.
