

HWg-Juno

HWg-Juno is I/O device for **IP CCTV integration**. You can **simply connect** Digital Inputs & Relay outputs to your **current** central **IP video** management system.

HWg-Juno support protocols for seamless integration with most of the IP Video software's.

- I/O device for IP CCTV
- **HWg-Juno** will be supported in IP CCTV you are using today.
- **HWg Juno** provides predicable flat integration cost.

HWg-Juno 101

HWg-Juno 404

HWg-Juno 1200

HWg-Juno 008

- 1 DI for Dry contact
- 1 DO Relay (50V)
- 1 sensor input
- WEB server
- Ethernet 100 Mbit
- PoE (IEEE 802.3af) or 5V wall plug power adaptor
- Wall mount

- 4 DI for Dry contact
- 4 DO Relay (50V)
- 1 sensor input
- WEB server
- Ethernet 100 Mbit
- 5V wall plug power adaptor
- Wall mount

- 12 DI for Dry contacts
- None DO
- None sensor input
- WEB server
- Ethernet 100 Mbit
- PoE (IEEE 802.3af) or 12V wall plug power adaptor
- Wall mount or rack mount kit

- None DI
- 8 DO Relays (50V) (Memory relays)
- 1 sensor input
- WEB server
- Ethernet 100 Mbit
- PoE (IEEE 802.3af) or 12V wall plug power adaptor
- Wall mount or rack mount kit

Why to use HWg-Juno

Reduce the integration cost

- No cost for software integration. HWg-Juno is hardware solution for plug & play I/O integration.
- You don't need programmer & SDK for I/O integration any more.
- Integrate I/O to your IP CCTV software in a minutes
- HWg-Juno enables flat predictable integration cost.

Easy to use

- HWg-Juno is integrated in the central IP Video software. It's simple IP Camera without image.
- No drivers needed in most of the software
- Simple installation with debug features.
- Outputs controlled from IP CCTV software.
- Outputs can control 110V / 230V power.

Location & Quantity

- You can place device for I/O where you really need it.
- HWg-Juno is family of products. Enjoy the scalability!
- No more I/O cables to IP Cameras
- You can install HWg-Juno to the cabinet, next to monitored technology
- You can choose the right Juno model, for how many I/O do you need in your application.

Quality of product

- European product prepared for real integration
- LED status information for all inputs & outputs.
- Fully documented integration for supported systems.
- European technical support & manuals.
- Memory relays option to manage power failure states
- Prepared for integration of external sensors

About HW group

HW group is a manufacturer of IP-based sensors. **HW group** delivers remote monitoring & control solutions.

HW group company is based in **Prague** in the Czech Republic. Company is focused to IP-serial port devices and IP remote monitoring products. **HW group** distribution network span over Europe, Middle East, South & North America.

Do you want to implement proprietary solution?

HWg-Juno is project for seamless integration, based on standard protocols for **IP CCTV**. If you want to implement **HW group** standard products to your system, we recommend standard Poseidon or Damocles product (XML or SNMP interfaces).

Unified protocol for integration all sensors for temperature, humidity, power, energy monitoring, Air-flow, power control, voltage, current, light, ...
